CASE MANAGEMENT COORDINATION OF CARE DEPARTMENT

The Case Management Coordination of Care Department provides services to members who experience complex health conditions or critical events that require the extensive use of resources and assistance navigating Florida Health Care Plans (FHCP) to facilitate the appropriate delivery of care and health coaching. Case Management Coordination of Care is considered a voluntary program and all eligible members have the right to participate or decline participation.

The aims of the Case Management Coordination of Care Program are to improve the health and quality of life of our members, identify and reduce socio-economic barriers, reduce inappropriate utilization of emergency department visits, reduce hospitalizations and re-admissions, and partner with providers to promote treatment plan compliance. The Community Resource Services does not substitute services for urgent evaluation or placement.

Florida Health Care Plans' Chronic Complex Care program assists members with complex health conditions that would benefit from additional support by a Registered Nurse Care Coordinator. The Registered Nurse Care Coordinator provides advocacy and education to help members navigate through the healthcare continuum, access appropriate care, and gain empowerment through self-management of lifestyle practices that can reduce disease progression and complications. The Chronic Complex Care program includes Transplant Case Management from pre-transplantation to one year post transplant and as needed.

Florida Health Care Plans' In-Home Providers- Home Docs for Volusia, Flagler, and Seminole Marketplace and Doctors at Home for Seminole and Brevard Marketplace are offered through the Case Management Coordination of Care Department. The service helps to supplement primary care services in the home. The initial visit for transition of care occurs within three business days and primary care services within seven business days. The goals of the In-Home Providers are to improve access to healthcare for homebound members to reduce the risk of disease progression; reduce risk of fragmented care; early interventions to reduce the need of the emergency department, hospitalization, and urgent care through management by primary care services; and facilitate transitional care for members discharged from the hospital to home with limited support to ensure compliance with follow up care, medication management, and reduce complications for the purpose to enhance quality of care.

CASE MANAGEMENT COORDINATION OF CARE DEPARTMENT (Continued)

Criteria for enrollment in case management may include members with new diagnoses, acute or uncontrolled chronic diseases and referrals through proactive data screening or referral of a member who requires any of the following:

Healthcare related advocacy across the continuum

Member education

Assistance with monitoring and treatment

Assistance with obtaining needed community resources

Assistance with health conditions compromised by psycho-social or behavioral health needs

Any clinical situation requiring care coordination to enhance continuity of care and quality of life

Florida Health Care Plans' Community Resource Services works in partnership with members and providers/referral sources to address the socioeconomic needs of members to improve access to healthcare related services through utilization of agencies and community partners. The Community Resource Coordinators will complete individualized needs assessments and connect members with appropriate existing resources offered through agencies or within their community. The Community Resource Services does not substitute services for urgent evaluation or placement. The goal of the Community Resource Services is to assist members with significant socioeconomic strain to identify actual or potential barriers through needs assessments for the purpose to improve access to healthcare by providing available community resources, or agency related services, and provide navigation through the continuum:

Facilitate the coordination of healthcare delivery through education of available resources that can reduce socioeconomic strain

Assist with access of resources available within the community or agencies

Provide education of community services or agencies that may or may not have fees associated

Facilitates member access to existing financial resources, such as those public assistance programs available through the Social Security Administration or Department of Children and Families

COLOGUARD TESTING

The Physician's office will need to complete the Cologuard Requisition Form available at

<https://d2ft3j3kbsqj8w.cloudfront.net/-/media/project/exactsciences/websites/cologuard/cologuard/files/pdf/doctor-discussion-guide.pdf?rev=7038f589cc064bf0a192e91e258b8b9e&hash=88E5F6E5618B8393C21EF0D2C644B42C>

Complete the form and fax the completed form to the number noted on the bottom of the form. Patient Insurance/Billing Information must be completed for FHCP to pay for the test. The easiest option would be to copy the patient's FHCP card and attach it to the requisition.

- Cologuard is for individuals 45 years or older, and at average risk.
- Cologuard looks for blood and DNA associated with colon cancer and pre-cancerous growth found in a person's stool sample.

Once ordered by your office, a Cologuard box is delivered to the patient's home via UPS. Patients collect their sample on their own time and use a prepaid return shipping label to send the specimen to Exact Sciences Laboratories in Madison, WI. for processing. Test results are sent directly to your office within a few weeks. **Please fax a copy of the test results to FHCP at 386 / 481-5009.** Exact Sciences also conducts follow up calls to drive high patient compliance. You can learn more about Cologuard at www.cologuardtest.com

- Cologuard is not a replacement for diagnostic or surveillance colonoscopy in high-risk individuals

PULMONARY REHABILITATION

REQUIRES PRIOR AUTHORIZATION. Please complete the “FHCP Referral Form” found at <https://www.fhcp.com/for-providers/> under the *Referrals, Prior Authorizations, and Orders* tab. Attach documentation supporting medical necessity. Fax the form and supporting documentation to FHCP’s Central Referrals Department at **386-238-3253**. The FHCP Central Referrals Department will review the request and, if approved, will forward the referral and clinical information to the provider for scheduling.

Routine requests: non-urgent and elective procedures should not be scheduled until approval is obtained to avoid patient financial responsibility. Please submit requests to FHCP Central Referrals Department as soon as possible, as it may take up to 14 calendar days for determination of authorization.

Urgent requests: Serious jeopardy to life, health, maximum function, or the ability to maintain maximum function all are classified as *urgent requests*. Physician offices should **call FHCP Central Referrals Department at 386.238.3230** to discuss urgent cases with a clinician, rather than faxing the request.
