J. Carol Grigg, M.D., Medical Director

Yvette Anderson, Practice Manager

March 25, 2009

Colleagues and Referring Providers:

All three of our Urgent Care locations have X-ray equipment and the images are **immediately** interpreted by our own physicians. We will report the result of that interpretation within the progress note you receive the day after their visit to us.

As a risk management tool, we do have EVERY film overread by Radiology Associates but that report is often 5-7 days after the visit and if significant may be faxed to you also.

If we find that a patient needs to be followed by orthopedics stat or sent to the Emergency Room, the films will be sent with the patient prior to being over read. We will send the films in a loaner jacket so that they may be returned to us.

Thank you,

J. Carol Grigg, M.D.
Medical Director
