<b>Important:</b> Diagnostic or therapeutic services rendered in physician offices, testing centers or other outpatient locations that are owned and operated by a hospital system are considered by the hospital system to be departments of the hospital. As a result, FHCP will be billed by the hospital for such services, and the member's outpatient hospital benefit will be applied to these claims. FHCP's Provider Directories and online Provider Search application provides information regarding which provider offices are actually hospital outpatient departments. Members should contact FHCP's Cost Estimation Center to determine if having the diagnostic test or service performed in a hospital or hospital owned facility will result in higher cost sharing.

This insurance issuer believes this plan is a "grandfathered health plan" under the Patient Protection and Affordable Care Act (the Affordable Care Act). As permitted by the Affordable Care Act, a grandfathered health plan can preserve certain basic health coverage that was already in effect when that law was enacted. Being a grandfathered health plan means that your plan may not include certain consumer protections of the Affordable Care Act that apply to other plans, for example, the requirement for the provision of preventive health services without any cost sharing. However, grandfathered health plans must comply with certain other consumer protections in the Affordable Care Act, for example, the elimination of lifetime limits on benefits.
