Re: Stereotactic Breast Biopsy Authorization Stipulation

We are pleased to inform you that, effective immediately, prior authorization requests for Stereotactic Breast Biopsies are no longer required for procedures performed at in-network imaging facilities.

Providers can now submit orders for Stereotactic Breast Biopsies directly to any participating imaging facility equipped to conduct this procedure. This change is intended to streamline the process and improve care for our members.

If you have any questions or concerns regarding this update, please do not hesitate to contact the Florida Health Care Plans Central Referral Department at 386.238.3230.

Thank you for your attention to this important announcement. We appreciate your continued collaboration in providing quality care to our members.
