Orthopaedics/Sports Medicine

Orthopaedics/Sports Medicine involves non-surgical treatment of conditions or injuries of bones, joints, ligaments, tendons, and muscles, including muscle and joint pain. Services can include evaluation and management, splinting, casting, therapy or injections. These providers also have additional training in sports medicine and provide medical care to active people to prevent or treat sports related injuries.

Contracted Hospital & Emergency Facilities

"Emergency Medical Condition" is defined as a condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that a prudent layperson, with an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in serious jeopardy to the health of the individual (or in the case of a pregnant woman, the health of the woman or her unborn child), impairment of bodily functions, or dysfunction of any bodily organ or part. FHCP contracts with the listed hospital and emergency facilities, however, for those members requiring emergency services where the time to reach a FHCP contracted facility would mean the risk of jeopardizing the member's health, the member should seek medical care and treatment at the nearest appropriate facility or hospital even if FHCP does not contract with same.

FHCP contracts with the following hospitals for inpatient, outpatient and twenty-four (24) hour emergency services; however, Pediatric admissions are only available at Halifax Health Medical Center, Daytona.
