CASE MANAGEMENT COORDINATION OF CARE DEPARTMENT

The Case Management Coordination of Care Department provides services to members who experience complex health conditions or critical events that require the extensive use of resources and assistance navigating Florida Health Care Plans (FHCP) to facilitate the appropriate delivery of care and health coaching. Case Management Coordination of Care is considered a voluntary program and all eligible members have the right to participate or decline participation.

The aims of the Case Management Coordination of Care Program are to improve the health and quality of life of our members, identify and reduce socio-economic barriers, reduce inappropriate utilization of emergency department visits, reduce hospitalizations and re-admissions, and partner with providers to promote treatment plan compliance. The Community Resource Services does not substitute services for urgent evaluation or placement.

Florida Health Care Plans' Chronic Complex Care program assists members with complex health conditions that would benefit from additional support by a Registered Nurse Care Coordinator. The Registered Nurse Care Coordinator provides advocacy and education to help members navigate through the healthcare continuum, access appropriate care, and gain empowerment through self-management of lifestyle practices that can reduce disease progression and complications. The Chronic Complex Care program includes Transplant Case Management from pre-transplantation to one year post transplant and as needed.

Florida Health Care Plans' In-Home Providers- Home Docs for Volusia, Flagler, and Seminole Marketplace and Doctors at Home for Seminole and Brevard Marketplace are offered through the Case Management Coordination of Care Department. The service helps to supplement primary care services in the home. The initial visit for transition of care occurs within three business days and primary care services within seven business days. The goals of the In-Home Providers are to improve access to healthcare for homebound members to reduce the risk of disease progression; reduce risk of fragmented care; early interventions to reduce the need of the emergency department, hospitalization, and urgent care through management by primary care services; and facilitate transitional care for members discharged from the hospital to home with limited support to ensure compliance with follow up care, medication management, and reduce complications for the purpose to enhance quality of care.

Additional Case Management Coordination of Care information on the following page

CASE MANAGEMENT COORDINATION OF CARE DEPARTMENT (Continued)

Criteria for enrollment in case management may include members with new diagnoses, acute or uncontrolled chronic diseases and referrals through proactive data screening or referral of a member who requires any of the following:

- Healthcare related advocacy across the continuum
- Member education
- Assistance with monitoring and treatment
- Assistance with obtaining needed community resources
- Assistance with health conditions compromised by psycho-social or behavioral health needs
- Any clinical situation requiring care coordination to enhance continuity of care and quality of life

Florida Health Care Plans' Community Resource Services works in partnership with members and providers/referral sources to address the socioeconomic needs of members to improve access to healthcare related services through utilization of agencies and community partners. The Community Resource Coordinators will complete individualized needs assessments and connect members with appropriate existing resources offered through agencies or within their community. The Community Resource Services does not substitute services for urgent evaluation or placement. The goal of the Community Resource Services is to assist members with significant socioeconomic strain to identify actual or potential barriers through needs assessments for the purpose to improve access to healthcare by providing available community resources, or agency related services, and provide navigation through the continuum:

- Facilitate the coordination of healthcare delivery through education of available resources that can reduce socioeconomic strain
- Assist with access of resources available within the community or agencies
- Provide education of community services or agencies that may or may not have fees associated
- Facilitates member access to existing financial resources, such as those public assistance programs available through the Social Security Administration or Department of Children and Families
- 855-233-7401 – Active Health

The Case Management Coordination of Care Department does not substitute for urgent evaluation or intervention by their healthcare providers; replace home health care or emergent services such Department of Children and Family, emergent placement to alternative living, skilled placement or staffing, or in-home safety evaluations; nor direct home health care or skilled placement referrals to the Case Management Utilization Review Department.

CHIROPRACTIC

Prior authorization from FHCP Central Referrals is not needed. To find a complete list of available direct access providers and the networks the providers participate in please visit fhcp.com or FHCPMedicare.com.

COLOGUARD TESTING

The Physician's office will need to complete the Cologuard Requisition Form available at Cologuard. Complete the form and fax the completed form to the number noted on the bottom of the form. Patient Insurance/Billing Information must be completed for FHCP to pay for the test. The easiest option would be to copy the patient's FHCP card and attach it to the requisition.

- Cologuard is for individuals 45 years or older, and at average risk.
- Cologuard looks for blood and DNA associated with colon cancer and pre-cancerous growth found in a person's stool sample.

Once ordered by your office, a Cologuard box is delivered to the patient's home via UPS. Patients collect their sample on their own time and use a prepaid return shipping label to send the specimen to Exact Sciences Laboratories in Madison, WI. for processing. Test results are sent directly to your office within a few weeks. **Please fax a copy of the test results to FHCP at 386 / 481-5009.** Exact Sciences also conducts follow up calls to drive high patient compliance. You can learn more about Cologuard at www.cologuardtest.com

- Cologuard is not a replacement for diagnostic or surveillance colonoscopy in high-risk individuals

COLONOSCOPY / DIAGNOSTIC

Prior authorization from FHCP Central Referrals is not needed, as long as the procedure is performed at participating Ambulatory Surgery Center or in the provider's office-based lab. The requesting provider will send an order to the specialist. Appointments can be made by the physician's office, or the member can call to schedule after the order has been received by the specialty office. The specialty office will advise you of their scheduling protocol.

Please note Pediatric Gastroenterology procedures and Repeat Colonoscopy/EGD within one year of a previous study do require prior authorization.
