

# Accessible *and* Affordable

The ACA aims to make healthcare more accessible and affordable, so it benefits anyone who needs insurance and doesn't have another source of coverage.

## *Tips for Sign-Up Success:* Open Enrollment

When you are ready, use these tips to make the process a little easier and get the right coverage for you and your family.

### **Open Enrollment:**

To enroll in an ACA health care plan, you need to register during the open enrollment period. If you miss this window, you must wait until next open enrollment to sign up again, unless you have a qualifying life event. Check with an agent for exact dates.

### **Come Prepared:**

When you sign up, be sure to have information like birthdays, social security numbers, and addresses for anyone covered by the policy. You'll also need employment and income information and details about your current coverage.

### **Look for Savings:**

Healthcare.gov has an easy savings tool that helps low-income individuals and families find new ways to save through programs like Medicaid or the Children's Health Insurance Program. Just input your household and income data to see if you qualify.

### **Talk to an FHCP Representative:**

Buying marketplace coverage does not have to be complicated or impersonal. If you don't want to apply online or over the phone, you can work with FHCP directly or with one of our partner agencies to find the perfect policy to fit your needs.

Florida Health Care Plans has a plan for everyone! We offer a variety of high-quality insurance plans at affordable prices to meet your unique needs. When you choose FHCP, you will have access to a robust network of healthcare providers conveniently located near you.
